

## Getting Started - Installation

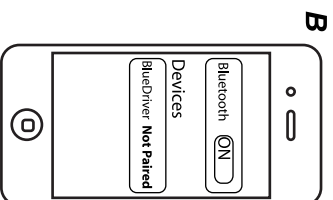

- 1:** While the vehicle is off, plug the Sensor into the OBD-II port (usually located under the dash on the drivers side)

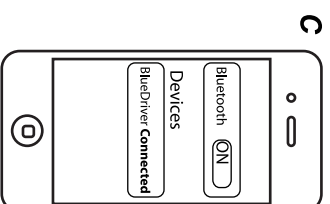

- 2:** Pair the iPod touch®, iPhone®, or iPad® to the Sensor

Select  
**Settings >  
General >  
Bluetooth**

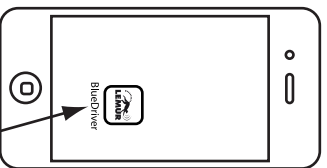

Ensure Bluetooth is **ON**.  
Wait for BlueDriver to appear  
under Devices

Select BlueDriver  
and wait for it to  
display **Connected**  
then Exit

**Note:** Sometimes when pairing with the Sensor, BlueDriver disappears from the Devices list before pairing is complete. If this happens restart your iPod touch, iPhone, or iPad. Make sure the vehicle is off in **Step 1** and re-install the Sensor.

- 3:** Start the vehicle, the Sensor LED will blink blue 10 times, then launch the BlueDriver App

Select  
BlueDriver
